Dear Friends,

"Value" is the watchword in health care these days, but lately I've been thinking about renewing vigor. We'll get there with you, together.

At HealthBegins, we're pursuing the vision of value sense of meaning: addressing social determinants can improve value while restoring a renewed vigor. To make a more personal difference does. (And it may even, in the long run, save money.)

This month, we're proud of the trainings and workshops that show how to demonstrate how an understanding of social determinants of health can lead to a better standard of care.

Don't get me wrong. The transition from volume to value, clunky and unable to shake the feeling that it leaves something missing. What "Value" is the watchword in health care these days, but lately I've been thinking about renewing vigor. We'll get there with you, together.
